 Ultrasuede® HP is a superlative upholstery material for any application. Extraordinary durability combines with ease of care: it cleans with water and light brushing maintains its luxurious feel and look for many years of satisfaction. Soft plush suede feels good under all temperature and climate conditions.

PRICE CODE **6** **E10 Top-Grain Leather**

E10.2 Spice

E10.1 Elk	E10.3 Camel	E10.4 Topo
E10.5 Wine	E10.6 Spruce	E10.7 Black

Only the best European cow hides are used to make this soft and supple natural furniture leather. It is the best grade of leather and will last a lifetime without cracking. Top grain is the natural face of a hide and transparent aniline dyes assure that the surface of the hide looks the way nature made it. Teflon provides protection against spills.

We can provide COATED LEATHER in many colors. Coated leathers are more colorfast than aniline dyed leathers and cleanable with soap and water, but they are not as sumptuously glove-soft. Please request samples if your application makes coated leather a desirable alternative.

Please note: The color reproductions of the fabric swatches are close to the original. If you are matching colors, please request actual fabric swatches.

All swatches shown are actual size unless otherwise noted.
